For your peace of mind

utilizing industry leading expertise and technology, to prevent the spread of viruses

Our products + services

- Service : Electrostatic spraying
- Additional products
- Environmental swabs
- Ozone purifier
- Ozone generator
- Misting tunnel
- Safety signage for covid awareness
- Sanitation stands

Our Vision

To be the industry standard for Covid-19-related preventative solutions specifically tailored to the education, residential, recreational, hospitality and corporate sectors.

How does it work?

Our Electrostatic Sprayers produce electrically charged spray droplets which are carried to the targets in a high-speed air stream.

Sanarc Disinfection Service

- Sanarc Solutions offers a two-pronged approach to fighting the Covid-19 pandemic; by combining Electrostatic Spray Technology (ESS) with our highly effective sanitizing agent
- Benefits of the service:
- Extended kill of up to 14 days (on most surfaces)
- Kills and neutralizes 99.99% of bacteria and viruses
- Touchless disinfection
- Reach complex areas with 360 degree wrap around disinfection layer Can be safely used on all surfaces including kitchenware, files, technology, etc.
- Up to 8x faster than traditional sanitation services
- Can be safely used on all surfaces and appliances including kitchenware, files, computers etc.
- Environment safe for occupation minutes after application

Additional Products

In addition to providing a disinfection service, we offer a comprehensive range of related products, including:

- Environmental swabs
- Covid-19 safety signage
- Ozone Purifiers
- Sanitation Stands
- Misting Tunnels

For more information, please see our product catalogue

How does our service differ?

Thanks to our patented sanitizer, our service offers a residual effectiveness of up to 14 days; when combined with ESS technology, our preventative package is not only far less time-consuming, but also, far more comprehensive in its preventative surface coverage. Our advanced techniques are guided by 25 years of industry-specific knowledge.

Recommended treatment procedure

Step 1: ESS spraying

Sanarc will do a full preventative treatment which encompasses a full coverage sanitation of the premises by means of ESS technology.

Step 2: Signage

After completing the sanitation treatment, we provide a variety of safety and educational signs.

Step 3: Sanitation stands

Hands-Free Sanitizing stands will be placed in areas which contain high human congregation, to ensure that hand sanitizer is readily available.

Step 4: Ozone

As a further means of precaution, 'Ozone Technology' can be placed in high-traffic areas, in order to decontaminate the surrounding air.

Step 5: External environmental swab

As a final measure to provide credible evidence that your environment is Covid-19 free, one can opt for a swabbing test which we will complete, and send off to a laboratory for testing.

What do you need?

for your peace of mind

What our customers think

"We highly recommend the service."

- C De Cerff and Associates

"The cost of the treatment was excellent value, and the process itself is non-intrusive and extremely efficient."

- Warwick Wealth
