

Corona Virus Infection Control

SANARC has the expertise to carry out coronavirus infection control on your premises. We will execute the disinfection of your business premises to the appropriate standards, with electrostatic spraying to give your business a clean bill of health and allow you to keep on trading.

What are the symptoms of the coronavirus?

Coronavirus infection usually presents with the following symptoms: Breathing difficulties or shortness of breath. Anyone suffering from a fever. In more severe cases, the coronavirus infection may cause pneumonia, severe acute respiratory syndrome, kidney failure and ultimately, even death.

How soon can we visit your premises?

Currently our services are in high demand and site visits will be allocated on a first-come, first serve basis.

How long do our infection control services take?

The time needed to treat your premises depends on the size of your premises and the total area that requires decontamination. On average this services is completed in 3 to 4 hours.

How soon after treatment can your business be operational?

After the decontamination spraying of your premises, the areas sanitized can be used immediately.

How can coronavirus infection be prevented?

First and foremost, you must avoid close contact with anyone showing coronavirus symptoms.

Preventative measures for the coronavirus include regular washing of hands and covering nose and mouth when sneezing or coughing.

What touch-points would be sanitized?

The frequently touched surfaces within your premises are likely to include the following:

- + Desktops and work surfaces
- + Doorknobs and handles
- + Light switches
- + Computer keyboards
- + Telephone handsets and headsets
- + Office and reception chairs
- + Canteen furniture
- + Crockery, cups, glasses, trays and utensils
- + Sinks and kitchens
- + Toilets
- + Water fountains
- + Vending machines
- + Tablets and digital devices
- + Lifts and escalators.

What processes do we use for corona virus decontamination?

ELECTROSTATIC SPRAYING –

SANITIZER SPRAY –

SANARC uses the a highly effective Sanitizer in conjunction with ESS technology.

Our product utilises a patented technology based upon the association of more than one biocide with a polymer material, the structure of which gives residual efficacy.

Highly effective, rapid kill against full range of microorganisms. Long lasting and continues to work even after it dries. Safe for humans, plants and other beneficial organisms. Can be used on practically all surfaces & substrates.

Biodegradable in the environment or removed in the waste system sludge. Ingredients are unlikely to cause resistant types or mutated strains.

Has a broad spectrum kill, effective against bacteria, yeasts, fungi, and spores. Significant tests passed include: EN1276 and EN1650. Tested and passed effective against: COVID-19 Corona Virus, Aspergillus niger, Bacillus subtilis, Bacteriophage, Escherichia coli 0157:H7, Listeria monocytogenes, MRSA, Pseudomonas aeruginosa, Salmonella enteritidis, Stigeoclonium tenue.

for your peace of mind
